PROJECTS

1. **Water.io**
March 2019
Team Size-6

A web-application created for Ministry of Water Resources, River Development & Ganga Rejuvenation in Smart India Hackathon'2019 to analyze the changes in the depth of wells for every 5 years on the basis of which graphically categorize wells as shallow and deep wells and generating water level trend with forecast.

https://github.com/sarthikbhat/SIH-Coderz

2. **News Web App**
July 2019
Solo Project

This project was created solely in React JS frontend library of JavaScript using the Google News API to fetch news from different sources and also had various filters based on location and categories of news.
http://newzie.herokuapp.com/

3. **NGO Web App**
March 2019
Team Size-4

This project was created in a hackathon. In this project we digitalized the member, volunteer and donor interface of NGOs so that everybody can have a hassle free experience while serving for the society.
https://github.com/sarthikbhat/DJ_ACM

4. **Product Wishlist Management System** October 2018

Team Size- 3

This project is a product wishlist system for hostel students who have to manage their monthly groceries and other items. It is designed in Java using SQL Workbench.

https://github.com/sarthikbhat/ProductWishListManagement

5. **Bank Management System** November 2018

Team Size- 3

This project is a simple bank management system using c-data structures which enables a user to add account, manage account, do transactions and see transaction history.
